bioviva FIBER plug

*Each box contains one
11mm x 7.5mm fiber plug*

- An efficient, predictable bone graft solution
- Featuring 100% human cortical cancellous bone fiber/particulate mix, an innovative solution for socket preservation
- Pre-shaped for easy placement, this bone plug hydrates in 20 seconds, expands by 10% plus, and eliminates the need for a membrane
- With both osteoconductive and osteoinductive properties, it promotes effective bone regeneration and prevents particulate migration
- Its large surface area absorbs PRF efficiently, ensuring reliable healing
- Incredible results in 10-12 weeks of over 90% healthy bone regeneration.

STEP BY STEP INSTRUCTIONS

Pre-hydrate
insert

Insert into
bone void

Hydrate and tamp
down into site

Place X suture over
the insertion area
